

Transportation Seminar Series

*Friday, October 3, 2008
4 - 5 p.m. in 240 Bechtel Engineering Center*

Anush A. Nejad, P.E.

Kimley-Horn and Associates, Inc.

I-80 Integrated Corridor Mobility Project

Abstract: The I-80 Integrated Corridor Mobility (ICM) project is intended to provide a balanced, reliable and safe roadway network along the I-80 corridor, through the use of advance traffic operation systems. The I-80 corridor has been historically the most congested corridor in the Bay Area, with over 20,000 vehicle hours of delay per day. The I-80 ICM Project will implement freeway, arterial and transit management systems elements to maximize the efficiency of the system. System components include Adaptive Ramp Metering, Variable Speed Limit Signs, Lane Management, Incident Management, Transit Management, Arterial Management and Commercial Vehicle Operations systems.

Bio: Mr. Nejad received his Master's degree in transportation engineering from the University of California at Berkeley. He is currently serving as Senior Vice President at Kimley-Horn and Associates, Inc. He is the project manager for the I-80 Integrated Corridor Mobility Project, which is the only dedicated ITS project for the California Bond Measure Program.

Please join us for a TRANSOC sponsored cookie hour in the ITS library at 3:30 p.m.
