VREF Future Direction

• What can VREF do to further strengthen the CoE Community?
• What should VREF projects and the CoE portfolio look like in some 5 years from now?
• When VREF started:
  – Safety, congestion, environment, etc…
  – How to cope with complexity
• Now: Climate change
  – We have got a time constraint
  – There is no technical or infrastructure solution identified
VREF Future Direction

• Much effort into supply management!
• Move Focus into Demand Management?

• May we have a different paradigm within the next 10 years?
• Are we stuck in our own path dependancy
• Time for path dislocation?
  – Strategic choices
